Additional skills

- Communication
- Customer Service
- Decision Making
- Analytical
- Problem solving
- Adaptability
- Teamwork
- Creativity
- Foreign Languages

Miscellaneous

Music School #12, Kazan, Russia — Flute, 2000 - 2006

Volunteer

Salvation Army, Waltham, MA 2006-2008

Profile

I'm a full stack web developer, passionate about programming and learning new languages. Prior to coding, I worked as an electrician for a local service company. Curiously enough, the part of the job I enjoyed the most was the installation of "Smart Home" products and home automation systems. Generally speaking, I've always been interested in sophisticated gadgets that simplify our everyday life. Looking into the near future, I see myself as a significant asset to a web development team working for a company that aims at implementing innovative technologies.

Experience

Web Developer Immersive, General Assembly, Boston, MA — 2018
During a 12 week 500+ hour course I developed, tested, and deployed four applications including 1 front end and 3 full stack projects.

- Project 1

Space Blast | Javascript, HTML5 Canvas, Ruby on Rails
This is a Arcade game created using HTML5 canvas and javascript for front end and Ruby on Rails for back end. Created entities of game controlled by JS function and hero controlled by keys pressed.

- Project 2

TPad | Handlebars, Bootstrap, Ruby on Rails
I've created this app using Ruby on Rails for back-end and used handlebars to display information. It uses Ajax requests to update/delete/create and show all data. It was a great experience learning how to work with RoR and how its structured.

- Project 3

Bucket List | Javascript, Express.js, MongoDB, Mongoose
Me and two other developers created this app by using Express.js for back-end and Javascript/Handlebars for front-end. It was a great experience learn how to work in team and use a github.

Other Experience

Lead Tech/Project Manager, FB Electrical Services, Needham, MA 2012 - 2018
Over 6 years experience as an electrician whose everyday tasks were managing team for long term projects with full communications with clients and being one of the top technician with universal skills.

Education

General Assembly, Boston, MA — Web Development Immersive, 2018
Kazan State University, Kazan, Russia — Physics Department, 2010
